«Athens Center for Entrepreneurship and Innovation (Aceln)»

Κέντρο Στήριξης Επιχειρηματικότητας και Καινοτομίας

Κεφαλληνίας 46, 2ος όροφος.

About Beat:

Beat is an app that transforms the way you move around the city. Tap on a button on your smartphone and get a ride in just a few minutes.

Beat started its life as Taxibeat, 7 years ago in Europe and 4 years ago expanded its operation in Peru where it serves millions of rides every single month. It currently operates in **Greece, Peru, Chile, Colombia and Mexico**, with more markets to come within the year. Beat is part of the FREE NOW group, the ride-hailing joint venture of BMW and Daimler.

Beat's **mission** is to create a new urban transportation experience, connecting thousands of passengers with available drivers, 24/7, at affordable prices. We want to make cities more accessible and help people unlock their unlimited possibilities.

We believe that technology can change the world.

We have organized ourselves to work in small and autonomous teams, following agile methodologies that enable us to act fast. Our top priority is to be efficient and develop groundbreaking technologies that improve the lives of millions of people around the world.

We are constantly growing our world-class operations and engineering team.

We are a product-focused company with engineering culture. Our projects include carpooling, automated pricing, advanced route planning by using microservices, machine learning and AI.

How **BEAT** Builds Products

28 March | 14.00 - 16.00

ACEin | Athens Center for Entrepreneurship
and Innovation
