Shanghai Ranking's Global Ranking of Academic Subjects

The Shanghai List ranks the world’s top Universities in 52 scientific fields. This classification was initiated in 2017. ARWU’s ranking criteria are:

- Number of papers authored by an institution in an academic subject
- Category Normalized Citation Impact from InCites database to measure average impact of papers
- Percentage of internationally collaborated papers
- Number of papers published in top journals per academic subject
- Number of faculty members that have won a significant award or distinction in a scientific field

All data for the above criteria are derived from the Web of Science database and cover the last 5 years.
