### **Θερινά Σχολεία.**

Founder and member of the organizing committee of the 1st - 12th Summer Schools in Stochastic Finance; an international event jointly organized by AUEB and the Univ. of the Aegean, July 2003-today.

### **Σεμινάρια.**

Since 2007 I have organized and run a weekly seminar on Stochastic Analysis and Applied Probability in the Department of Statistics, AUEB. The seminar is open to staff, post-docs and PhD students and concentrates on themes that change every semester. The theme this semester is Reproducing Kernel Hilbert Spaces and the applications of functional analysis in infinite dimensional statistics. Previous themes included Malliavin Calculus and Applications, Infinite Dimensional Stochastic Analysis, Semigroup Theory and Markov Processes etc.
